

This certificate program is specifically designed for current nursing professionals holding a Master’s degree or higher in nursing who may be in advanced practice, education, leadership, and/or direct patient care roles. This program will prepare nurses for careers in administration and leadership. The certificate program includes educational concepts such as finance & budgeting, quality measures, improving the client experience, interprofessional collaboration, advanced information technology, and systems-based thinking. It provides the nurse skills to pursue administrative or managerial positions and leadership roles in a range of health care settings. The student will gain valuable hands-on experience in a clinical practicum with experienced nurse leader preceptors.

This is a 22-credit hour program, consisting of six didactic and two 3-credit clinical courses. All didactic courses are offered via a mix of synchronous and asynchronous, web-based modalities. Two semesters of clinical practicum are required for a total of 300 clinical hours. These hours will be completed with a nurse leader mentor in a healthcare setting. Preceptors will be selected based on direct experience with human resource management, budget & finance responsibilities, quality & safety responsibilities and interprofessional collaboration.

Graduates will be prepared for Nurse Executive Certification (NE-BC) through the American Nurses Credentialing Center (ANCC) or to become Certified Nurse Executive Practice (CENP) through the American Organization for Nursing Leadership (AONL).

OPTION 1: Four Semesters: mix of didactic and clinical throughout progression
